### Delving into Film Photography

I am requesting \$500 to purchase a film camera, photographic paper, and film. With these materials, I would be able to learn more about film photography and how it relates to my printmaking practice. I am currently enrolled in ARTS 2110: Introductory Photography in which I am learning about black and white film photography practices. With this grant, I would be able to explore my photographic interests and explore the realm of color film photography outside of class. I am concentrating in printmaking, and ultimately, a goal of mine would be to incorporate my photographs into prints, such as through photo transfer lithography. As well, I am currently taking ARTS 3670: Intermediate Printmaking, in which I hope to explore some of these techniques that combine photography and printmaking. If funded, I will provide scans of my film photographs that I will be able to shoot and develop with these materials. This grant will help me to further my artistic practice through learning a discipline that is relatively new to me.

#### Timeline

October 2023	Order materials Begin shooting film Begin developing photos in darkroom
November/December 2023	Finish shooting film Finish developing photos in darkroom Finalize prints and reprint as needed Scan prints Submit outcome report
