

Fall 2023 Minigrant Outcome Report

Hyebin Lee

Portraits with Prime Lens

With the minigrant, a prime lens was acquired to elevate the quality of my photography and videography work. The choice of the lens was based on extensive research aimed at identifying the best option within the \$500-600 price range.

The selected prime lens stood out due to its superior auto-focus capabilities, low aperture, high clarity, and robust build quality. Among the other lenses in this price range, this lens was the most compatible with my camera.

I was able to use this lens in both photography and videography projects. The lens has not only met but exceeded expectations, contributing significantly to the overall aesthetic appeal of the captured images and videos. The quality and clarity achieved through this lens have positively impacted the overall outcome of my creative projects.

I am very thankful for this minigrant. The support provided has not only facilitated the acquisition of essential equipment but has also had a direct impact on the quality and professionalism of my creative endeavors.

*I have attached a few pictures taken with this lens at the end of this report.

Budget:

Name	Cost (without tax)
Sony FE 85mm f/1.8 Lens	\$548.00
Total	\$577.04 (with tax)
