Grant Proposal for Dorico and 1TB of Storage

Outcomes

I am grateful for the Miller Arts Minigrant for giving me the opportunity to purchase new notation software and storage. Dorico has streamlined my process greatly and the playback sounds phenomenal. I love the way the software allows me to manipulate rhythms and time. The score outputs are extremely professional and automatically uses the most suitable notation. Furthermore, I got some money from the Student Arts Fund to further support me and I have been making great progress with my enhanced tools.

Unfortunately, due to issues in receiving materials later than I expected, I wasn't able to go through with my plan. However, I did work that I find much more meaningful in my pursuits regarding the equipment I bought.

The reason I wanted Dorico over MuseScore is because of how much more professional it was with its engraving methods. I was able to have two of my scores read outloud, which is the ultimate goal of creating these scores.

- ❖ Arrangement of the *Good Ol' Song* (Traditional) for Symphony Orchestra
 - [Link to Recording at 59:35](#)
 - The Cavalier Symphony Orchestra's old arrangement was difficult to read as it was copies passed down and marked up throughout generations. We needed an update and we strive to make the highest quality music and that starts with the highest quality scores.
 - Score below.
- ❖ Arrangement of *See You Again* by Tyler the Creator for Wind Quintent
 - [Link to Recording](#)
 - Assignment for Orchestration I with Benjamin Rouss. I am very lucky to have professional musicians (UVA Faculty) read my score. And I am even more grateful for the Miller Arts Minigrant for giving me the tools to give them something well notated.
 - Score below.

Although different from my initial intentions, I find my outcomes have given me much more practical experience and I have learned more applicable skills this way. I still am making headway on my composition projects and grateful for the tools Miller Arts minigrant has given me.
