Painting Supplies for Learning about Color

I am asking for \$500 for painting supplies so that I can learn more about how color theory works. I am a Studio Art major with a Printmaking concentration. The more advanced processes in printmaking often involve color mixing and layering, but I do not have much experience with color because I have not painted much before. With these painting supplies, I will be able to learn how to paint and how colors can work together. I am hoping that by doing this project, I will thus be able to improve my printmaking skills because I will have a better understanding of color theory. My printmaking mentor, Professor Akemi Ohira, has recommended that I practice painting to learn more about color and improve my prints. In addition, many printmaking techniques involve painting techniques. An example which I will be working on is using tusche wash to create lithographs. The tusche wash is used as you would use paint, so these painting supplies will also allow me to work on my painting technique and help improve my prints.

Timeline

October/November 2024	Order materials, begin practicing with paint supplies, begin paintings
December 2024	Finalize paintings, submit outcome report displaying what I have learned about color theory

Budget

Miller Arts Scholars Minigrant Budget				
Painting Supplies	Description		Source	Date Visited
Gamblin Artist's Oil Color - Ultramarine Blue, 150 ml tube	Oil paint for painting	\$22.80	Blick	18/09/2024
